Enhancing communities

In order to promote 'green travel' to the site, Muse pro-actively engaged with the Council and local bus companies to launch a dedicated shuttle bus service that linked into rail and bus networks.

Improving The Environment

The landscaping strategy retained much of the site's mature parkland. A minimum of 40 % of the site area is green or soft landscaping, including lakes.

Working Together With Our Supply Chain

Now home to over 30 companies and some 2,000 employees, more than 600,000 sq ft of development has been completed by Muse to date.
