New Bailey multi-storey shortlisted for British Parking Awards

The new Stanley Street multi-storey car park at New Bailey in Salford has been shortlisted for Best New Car Park in the British Parking Awards 2019.

The second multi-storey car park to be delivered at The English Cities Fund's Salford scheme offers 633 spaces, operated by NCP, and is now complete and open to the public. The English Cities Fund is a joint venture between Muse, Homes England and Legal & General.

It uses energy efficient LED lighting and is fitted with six electric vehicle charging points, along with 20 wide bays to make sure it meets the diverse needs of customers.

The new site also offers the latest customer-focused payments facilities, including Automatic Number Plate Recognition (ANPR), so those who sign up can make automated payments when they park – removing the need for them to visit kiosks or payment machines.

Phil Mayall, regional director for the North West at Muse Developments, said: "It's great news that after completing in December, our new Stanley Street car park is already shortlisted for an award.

"Its impressive design is providing a striking backdrop to the rest of the scheme, as well as offering additional parking for the many businesses and residents relocating to the area."

The winners will be announced at an awards ceremony at the Royal Lancaster hotel on Friday 8 March.
